

Marshlands Primary School: Our Learning Communities

At Marshlands Primary School, staff work collaboratively, using their expert knowledge and skills to develop our curriculum. This ensures that the National Curriculum is implemented to a high standard and that there is a clear progression of knowledge and skills embedded across school.

Our Learning Communities are able to identify our strengths and areas for development, alongside providing supportive coaching and training to raise the achievements of pupils and further develop the subject knowledge of staff. Regular monitoring, feedback and discussion by Subject Coordinators and their Learning Community improve outcomes for pupils and ensures continuous professional development for staff.
