

By the end of the unit, pupils will be able to answer...

- How do we see?
- How do we hear?
- Which body parts are used for which senses?

Vocabulary	Definition
ear	a part of the body used for hearing
eye	a part of the body used for seeing
hear	to sense a noise
nose	a part of the body used for smelling
see	to sense what things look like
senses	bodily functions that we use to interpret the world around us
smell	to sense an odour
taste	to sense a flavour
tongue	a part of the body used for tasting
touch	to sense what something feels like

Investigate!	
• Label different parts of the body and describe what each part does • Participate in sensory investigations, tasting, feeling and looking at different foods	• Use different senses to compare different textures, sounds and smells • Look at activities in which we use more than one sense • Research animals and how they have similar senses to humans
